

Swiss Institute of  
Bioinformatics

A QUICK GUIDE TO OUR BRAND IDENTITY

# Brand guidelines

SIB Communications and Scientific Events

2024

# A leading organization with a strong brand

Since its creation in 1998, SIB has grown into an internationally recognized organization, dedicated to biological and biomedical data science meeting the needs of millions of users in the life sciences.

**Our brand identity was revisited on SIB's 25<sup>th</sup> anniversary to better reflect our unique positioning in the life science ecosystem, at the intersection between the organic and digital worlds.**

Applying these brand guidelines across the organisation is essential to **convey our purpose as Data scientists for life** in a coherent way to all our partners and stakeholders.

EXPLAINING WHO WE ARE AND WHAT WE DO

# Brand positioning

# Our name

## How our official name should be written and formatted

When introducing the name of the institute for the first time in a text, it should be written in full as shown below:

English: **SIB Swiss Institute of Bioinformatics**

French: **SIB Institut Suisse de Bioinformatique**

German: **SIB Schweizerisches Institut für Bioinformatik**

Italian: **SIB Istituto Svizzero di Bioinformatica**

The abbreviation SIB may be used after this first occurrence.

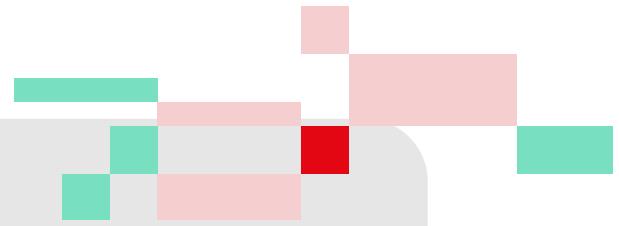

# Our vision

At SIB, we know that expertise with life science data is key to solving many of the world's most pressing challenges.

We unlock the potential of biological and biomedical data and generate knowledge to enable innovation for a better future.

# Our mission

To push the boundaries of data science through in-depth knowledge of biological data, cutting-edge technologies, and interdisciplinary collaborations

To provide researchers and clinicians with outstanding resources, services and training, to accelerate innovation in many different fields

To federate and represent Swiss bioinformatics. By fostering a culture of scientific excellence and collaboration, we contribute to maintaining Switzerland as one of the top innovative countries in the world.

# Our tagline

Encapsulating who we are and our greater purpose and mission

Data scientists for life

# Our boilerplate (English)

## Presenting SIB in official documents

SIB is an internationally recognized non-profit organization, dedicated to biological and biomedical data science. Our data scientists are passionate about creating knowledge and solving complex questions in many fields, from biodiversity and evolution to medicine. They provide essential databases and software platforms as well as bioinformatics expertise and services to academic, clinical, and industry groups. SIB federates the Swiss bioinformatics community of some 900 scientists, encouraging collaboration and knowledge sharing. The institute contributes to keeping Switzerland at the forefront of innovation by fostering progress in biological research and enhancing health.

# Our boilerplate (French)

## Presenting SIB in official documents

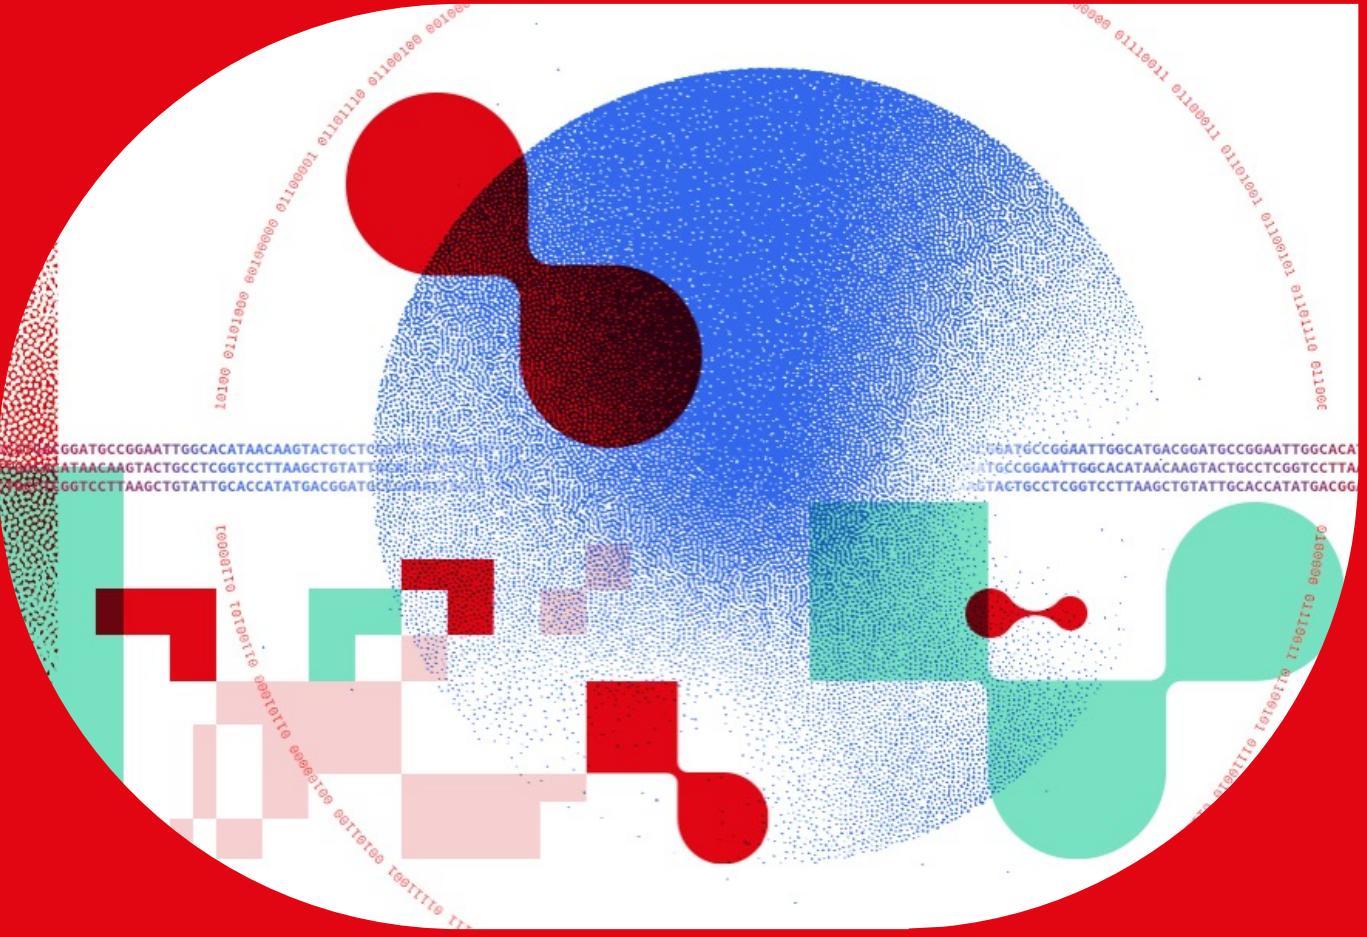

Le SIB Institut Suisse de Bioinformatique est une organisation à but non lucratif reconnue au niveau international et spécialisée en science des données biologiques et biomédicales. Ses scientifiques traduisent les données en savoirs et se passionnent pour les questions complexes dans de nombreux domaines des sciences du vivant, de l'écologie à la médecine. Ils fournissent des bases de données, des logiciels et de l'infrastructure informatique essentielle à la recherche ainsi qu'une large palette d'expertises en bioinformatique utiles aux institutions publiques et privées. Le SIB fédère la communauté bioinformatique suisse, qui compte quelque 900 scientifiques, en encourageant les collaborations et le partage de connaissances. L'institut contribue ainsi à maintenir la Suisse à la pointe de l'innovation en favorisant les avancées de la recherche biologique et du domaine de la santé.

# Our boilerplate (German)

## Presenting SIB in official documents

Das SIB ist eine international anerkannte, nicht gewinnorientierte Organisation, spezialisiert auf biologische und biomedizinische Datenwissenschaften. Ihre Wissenschaftlerinnen und Wissenschaftler wandeln Daten in Wissen um und befassen sich leidenschaftlich mit komplexen Fragen in vielen Bereichen der Lebenswissenschaften, von der Ökologie bis zur Medizin. Sie stellen öffentlichen und privaten Institutionen Datenbanken, Software und IT Infrastrukturkomponenten zur Verfügung, die für die Forschung unverzichtbar sind, und bieten ein breites Spektrum an bioinformatischem Fachwissen an. Das SIB vereint die Schweizer Bioinformatik-Gemeinschaft, die rund 900 Wissenschaftlerinnen und Wissenschaftler umfasst, und fördert die Zusammenarbeit und den Wissensaustausch. Auf diese Weise begünstigt das Institut Fortschritte in der biologischen sowie der Gesundheitsforschung und trägt dazu bei, dass die Schweiz in Sachen Innovation weiterhin führend bleibt.

THE MEANING BEHIND THE LOOKS

# Visual identity

# Our logo

SIB's full logo is made of two elements:

- » the “emblem”: a molecule and a cross, together with the acronym “SIB”
- » the text element: the name of the institute below the emblem

**Swiss Institute of  
Bioinformatics**

# Explaining our logo

The emblem represents who we are and what we do:

- » The **Swiss flag and colours** show :
  - » The hallmark of excellence and reliability
  - » The history of the institute
- » The **computer screen-like shape** of the emblem illustrates bioinformatics and computer science.
- » The **molecule** (a portion of a protein) represents life sciences, a federated organization, connecting bioinformaticians.
- » The **two ends of the molecule**, located outside the logo, indicate that SIB's impact go far beyond Swiss borders.

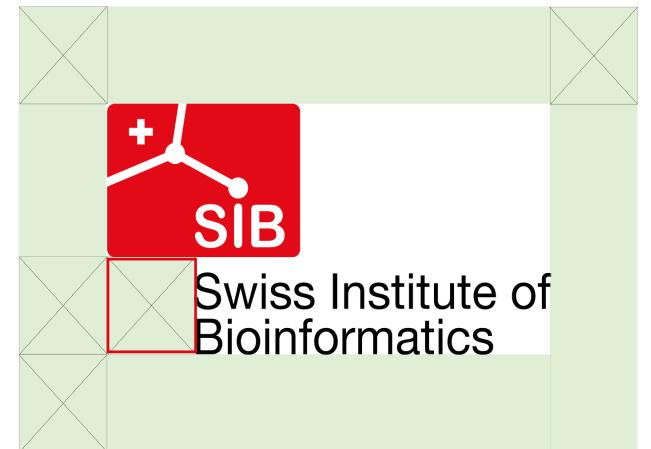

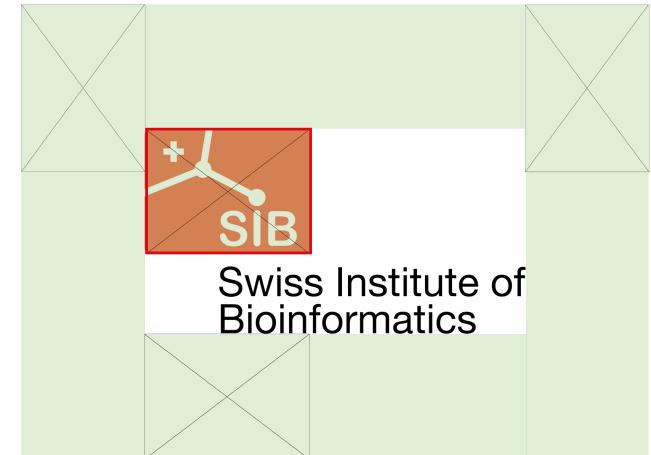

# Logo usage

## Protection zone

When using the SIB logo, make sure no elements are placed within the:

- » **optimal protection zone**, i.e. the size of the emblem
  
- » or **minimal protection zone**, i.e. the size of the square zone located below the emblem, when more space is not available

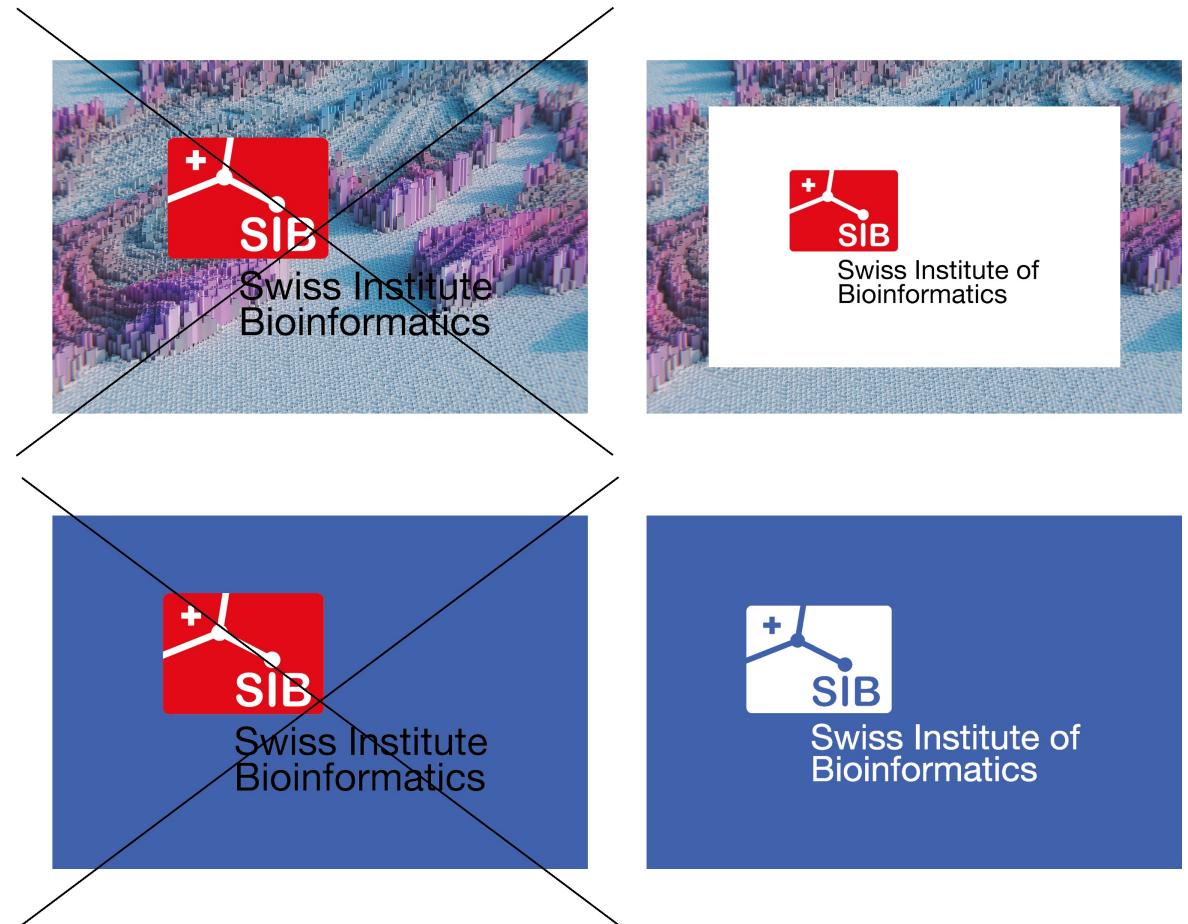

# Logo usage

## Using the logo on a coloured background

Our logo should only be displayed on a uniform background, either with the protection zone in a white rectangle, or by using its white version.

**Download** our logo in different formats [here](#) or  
[contact us](#) if you need other options.

The SIB logo is available under the creative commons license  
[CC BY-NC-ND 4.0](#)

# Typography

## Approved typefaces

For our official printed materials and websites:

- » The **Cabinet Grotesk** typeface is used for our headlines and highlights, has a contemporary design and conveys an idea of precision and analysis.
- » The **Inter UI** typeface is used for our body texts and was selected for its readability and modern, innovative look.

For day-to-day office use, from Word documents to emails:

- » **Corbel**, 12pts – freely available by default in all MS Office applications

We turn **life science**  
**data** into **solutions**

Are you a life scientist, a clinician, a biotech or biomedical start-up, SME or pharma? You are at the right place: **the SIB Swiss Institute of Bioinformatics** is an internationally recognized non-profit organization dedicated to **biological** and **biomedical data science**.

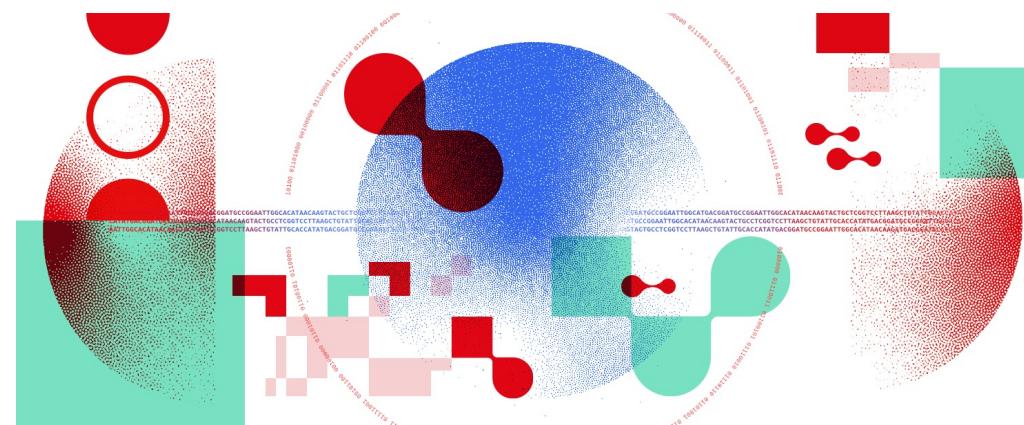

# Our graphical environment

## Our distinctive style, design elements and visual aesthetics

Our activities are at the cross-road between cutting-edge technologies and human expertise. They also impact life and society across a range of domains, such as personalized medicine or biodiversity.

Our brand identity reflects these different facets:

- » modern and impactful colours ranging from warm pink to electric blue;
- » graphic elements that play around the themes of digitalization, data integration, biology, big data.

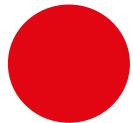

# Our colours

## The official SIB colour palette

# Branded templates

Maintaining a consistent branding across our communications

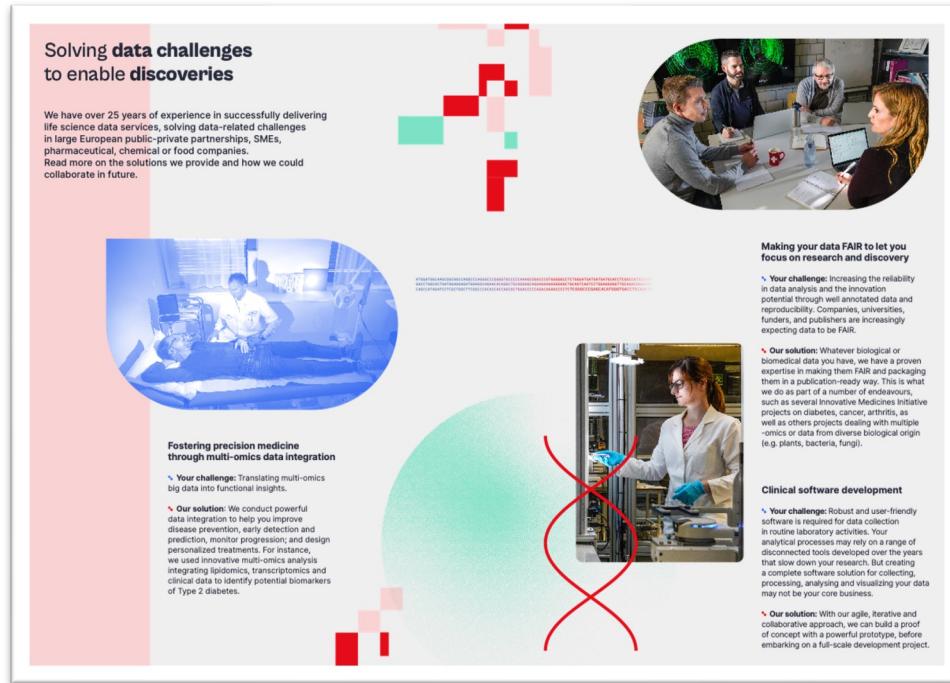

Brochures, flyers, roll-ups (on request)

**We turn life science data into solutions**

**Advancing innovation and health with a complete offering of bioinformatics services**

We are an internationally recognized scientific organization specialized in life science data. We offer professional services and solutions to our academic, clinical and industry partners. Our solutions can be applied to any field in the life sciences, from agriculture and environment to precision medicine and infectious diseases.

**Solving data challenges to enable discoveries**

We have over 25 years of experience in successfully delivering life science data services, solving data-related challenges in large European public-private partnerships, SMEs, pharmaceutical, chemical or food companies. Read more on the solutions we provide and how we could collaborate in future.

**Fostering precision medicine through multi-omics data integration**

▼ Your challenge: Translating multi-omics big data into functional insights.  
▼ Our solution: We conduct powerful data integration to help you improve disease prevention, early detection and prediction, monitor progression and design personalized treatments. For instance, we used innovative multi-omics analysis integrating epidemiomics, transcriptomics and clinical data to identify potential biomarkers of Type 2 diabetes.

**Clinical software development**

▼ Your challenge: Robust and user-friendly software is required for data collection in routine laboratory activities. Your analytical processes may rely on a range of different tools, which can add up over the years that slow down your research. But creating a complete software solution for collecting, processing, analysing and visualizing your data may not be your core business.  
▼ Our solution: With our agile, iterative and collaborative approach, we can build a proof of concept with a powerful prototype, before embarking on a full-scale development project.

**Making your data FAIR to let you focus on research and discovery**

▼ Your challenge: Increasing the reliability in data analysis and the innovation in research through making your data and reproducible. Companies, universities, funders, and publishers are increasingly expecting data to be FAIR.  
▼ Our solution: Whatever biological or biomedical data you have, we have a proven expertise in making them FAIR and packaging them for reuse in other projects. This is what we do as part of a number of endeavours, such as several Innovative Medicines Initiative projects on diabetes, cancer, arthritis, as well as others projects dealing with multiple -omics or data from diverse biological origin (e.g. plants, bacteria, fungi).

# Branded templates

## Maintaining a consistent branding across our communications

In Office365, SIB templates are available on Word and Powerpoint.

You can directly open them when you start the applications by clicking “New from template” on Mac, or “New” on PC, you will find the templates stored under the “SIB Swiss Institute of Bioinformatics” menu.

Alternatively, you can access them below:

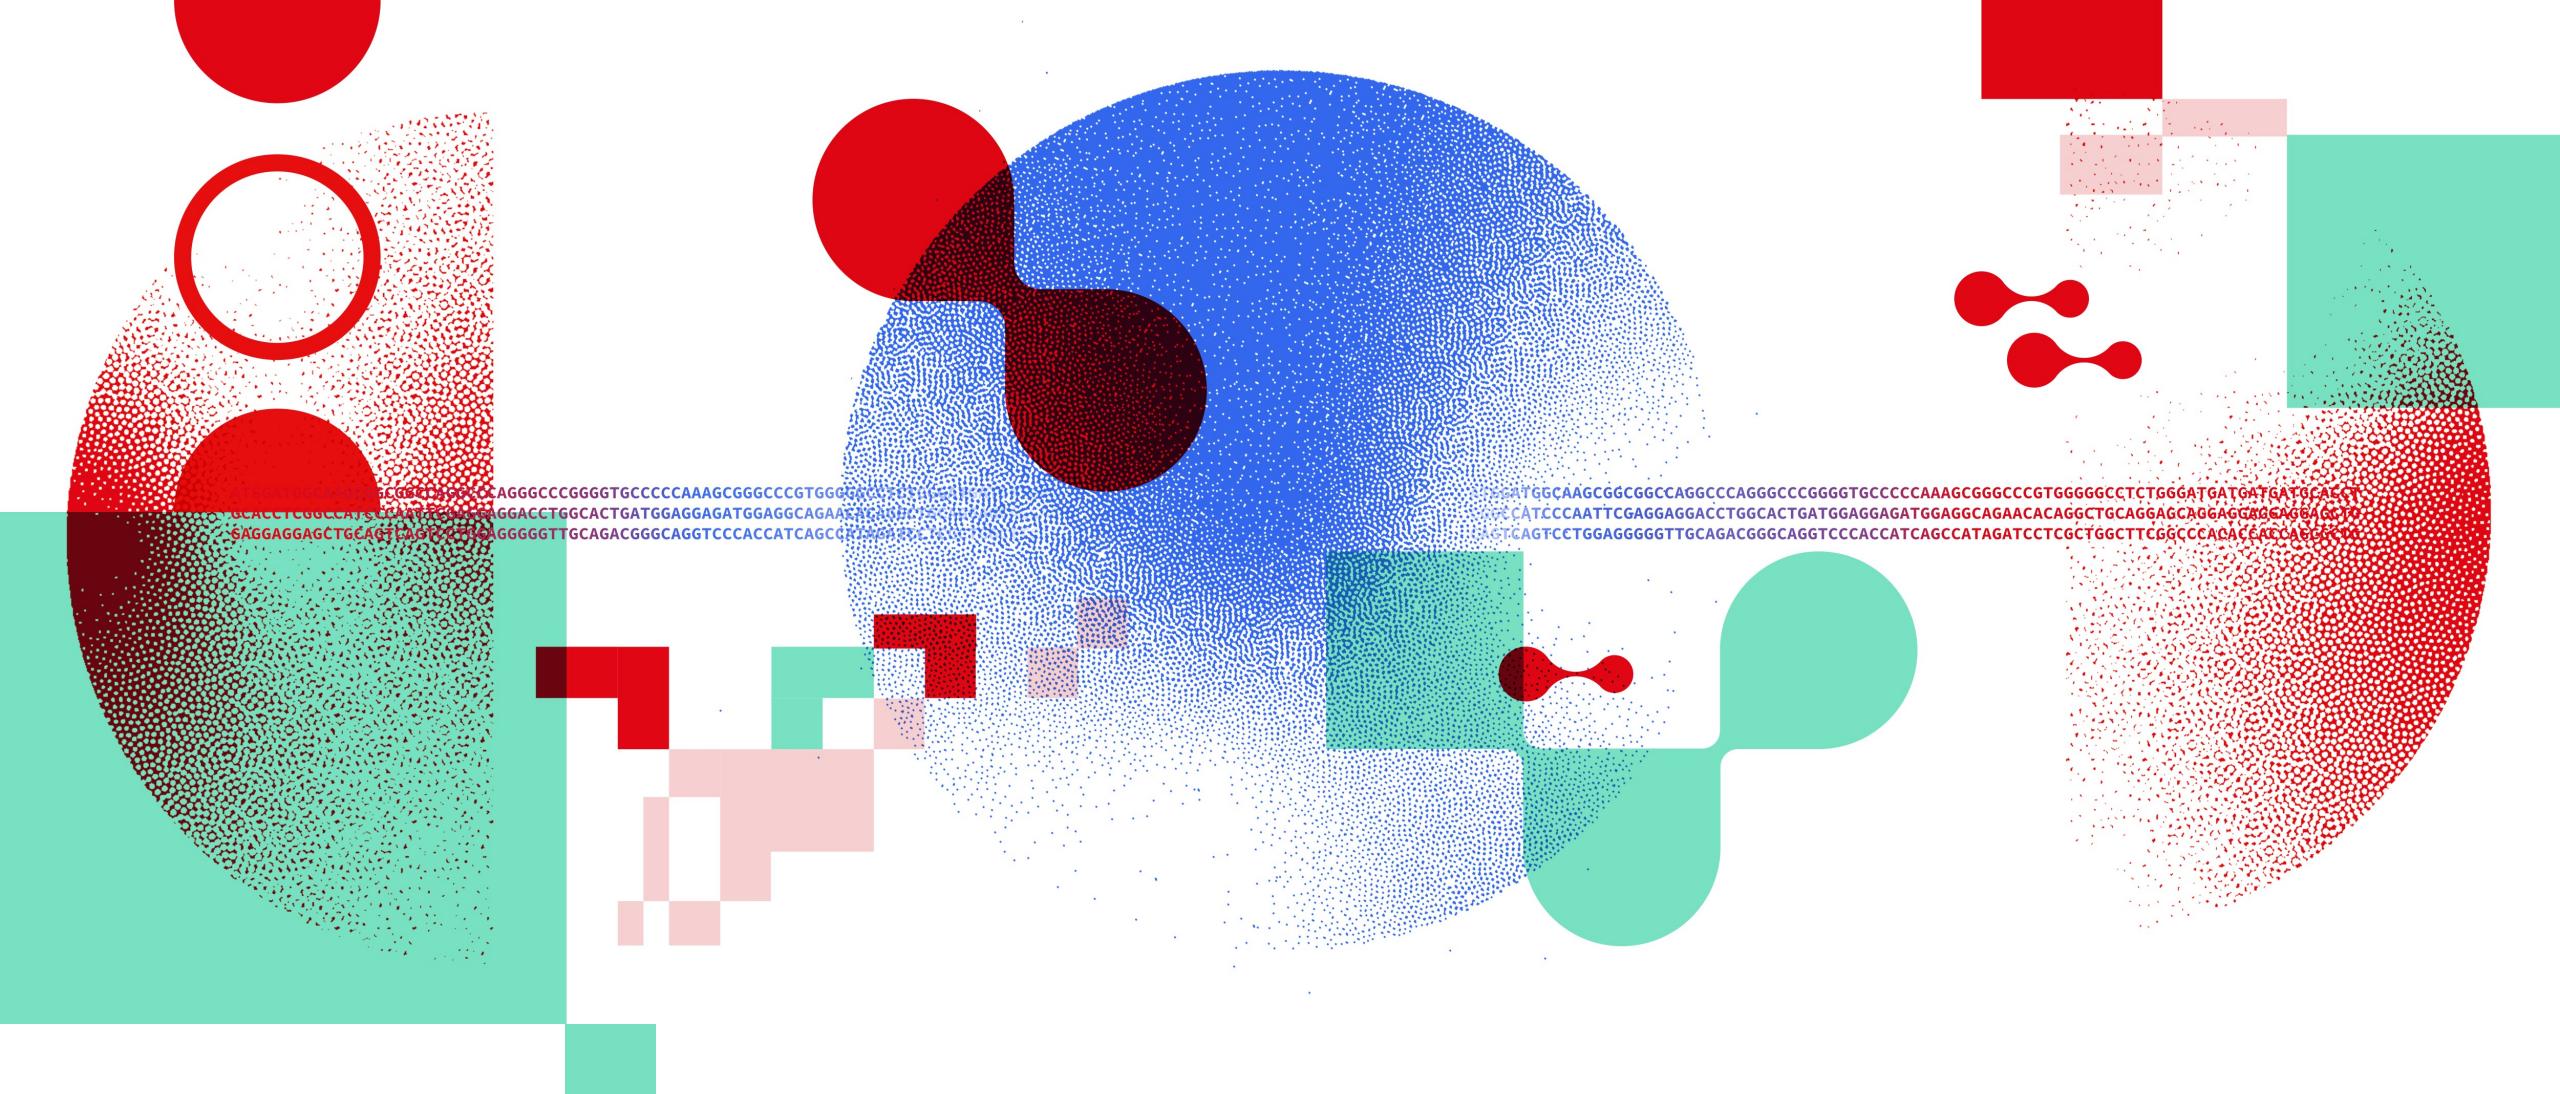

- » Word templates:
  - » [English letter](#)
  - » [French letter](#)
- » [Power Point presentation](#): Your 3-in-1 companion incl. SIB-branded slides, a library of graphical elements, and a slide-deck to present SIB in 5min and to use in your own presentations.

# Contact

Thank you for contributing to uphold  
our brand guidelines!

The Communications Department is the guardian of SIB's identity. Please address all questions and issues regarding branding needs, use of our logo and other graphic elements to [communication@sib.swiss](mailto:communication@sib.swiss)

# Thank you
